Bee's Field:

- This project will lower the top of the banks to approx. the 25-year flood elevation level in this area, allowing the floodwaters to spread out over the field.

Arena renovation details:

- Remove existing footing material and drainage system
- regrade the arena to reduce final slope down to 1% over the arena
- Install a more robust kickboard fence

Ring & Bank Work:

- Lower the elevation of the work area between the arena edge and Brook baks to allow additional flood storage capacity
- Disturbed areas to be re-planted

Restoration details:

- A bench will be created along and next to the stream channel that would widen the Brook to hold increased flood waters
- Top of bench would be at the level of the 10-year storm event
- All storms smaller than the 25-year design storm would be contained in channel

Crackerjack was bred in New Hampshire by Lucy Baird Boynton and Colin Davidson (Lucy's son) and produced by Colin.

After Colin's passing Boyd Martin took the ride on Crackerjack – *Crackers* – as he was affectionately known. In 2015, Crackers had an impressive first run at the Kentucky CCI5★ and finished in the Top-25. Crackers collected multiple top placings at the Advanced and CCI4★/5★ levels including a 2nd place finish at the Plantation Field CCI4★-S, a 7th place finish at the Kentucky CCI5★, and a 10th place finish at the Luhmuhlen CCI5★.

Crackerjack will be remembered as the epitome of an upper level event horse – small in stature, but huge in heart. His jumping technique was perfection, his stamina characteristic of a thoroughbred and while he was always opinionated, he could be trusted to tackle whatever was in front of him.
